Welcome

We're delighted to offer you this Consultant Directory for Cleveland Clinic London. It includes information about all of our services and specialist consultants.

Cleveland Clinic is one of the leading providers of specialised medical care in the world, focused on delivering clinical excellence and superior patient outcomes. We have hospitals, outpatient centres and wellness centres in the U.S., Canada, the United Arab Emirates and now here in the U.K.

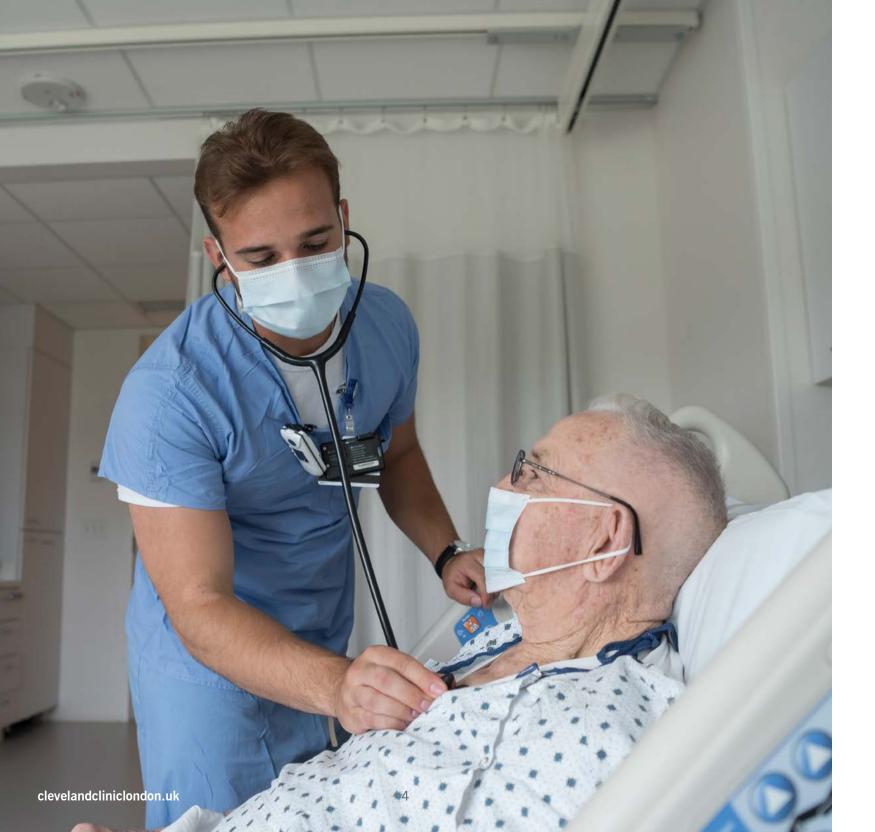

Cleveland Clinic London Hospital facilities include a 12-bed Acute Admissions Unit and a 29-bed Intensive Care Unit (ICU), with 24/7 onsite specialist consultant care, supported by an on-call multidisciplinary team of clinical experts.

Cleveland Clinic Portland Place Outpatient Centre, in the Harley Street Medical Area, offers quick access to consultant specialists and state-of-the-art diagnostic facilities.

Our exceptional facilities and advanced technology are designed to enhance your patients' experience and provide them the highest quality of care. We are committed to making sure your patients' time with us is as comfortable as possible.

We have dedicated GP Liaison, Global Patient Services and Patient Experience teams on hand at every stage to ensure everything runs smoothly and to answer any questions you or your patients may have.

We look forward to welcoming your patients.

Our Safety Measures

As the unprecedented challenges of COVID-19 persist, we continue to follow government guidelines and are dedicated to providing the safest possible healthcare environment for your patients. Cleveland Clinic has long prioritised patient safety through infection control, and we have measures in place — guided by national and international best practices — to minimise the risk of infection. The latest guidance for patients is available at clevelandcliniclondon.uk.

Getting Here

Call our general inquiries line: +44 (0)20 3423 7000

Cleveland Clinic London Hospital

33 Grosvenor Place London SW1X 7HY

We encourage patients to travel to our hospital by public transport or taxi, or to be dropped off by a friend or relative, as we do not have an onsite car park.

Travelling by public transport

The nearest London Underground stations to our hospital are Victoria (Victoria, Circle and District lines) and Hyde Park Corner (Piccadilly line). Victoria is a mainline railway station and also has direct links to Gatwick Airport via the Gatwick Express. There are also many bus routes that go past or near the hospital.

Travelling by car

Our hospital is in a metered parking area with several pay and display bays which allow parking for up to four hours. These bays are all within a short walking distance of the hospital on Chester Street, Chapel Street and Montrose Place.

There is a drop-off and pickup point outside both entrances of the hospital, on Grosvenor Place and Chester Street. We are able to offer a limited number of parking bays to our patients and visitors. These are available at Euro Car Parks - a few minutes' drive from the hospital:

The Mayfair Car Park
Park Lane
Achilles Way
London W1K 1AB

Getting Here

Call our general inquiries line: +44 (0)20 3423 7000

Cleveland Clinic Portland Place Outpatient Centre

24 Portland Place Marylebone London W1B 1LU

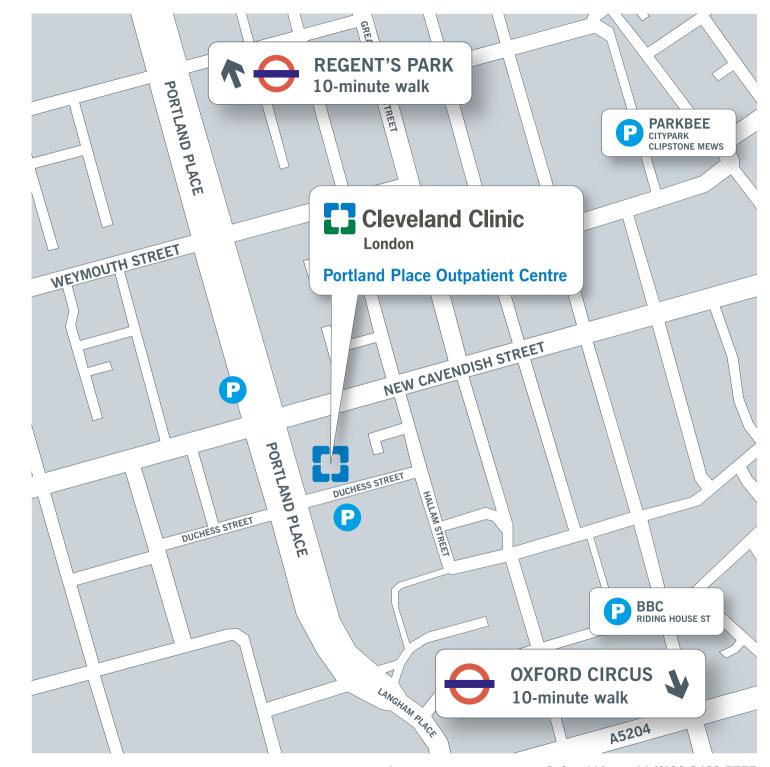

We encourage patients to travel to our outpatient centre by public transport or taxi as we do not have an onsite car park.

Travelling by public transport

Portland Place Outpatient Centre is well connected, with excellent transport options. The nearest London Underground stations are Oxford Circus (Victoria, Bakerloo and Central lines) and Great Portland Street (Circle, Hammersmith & City, and Metropolitan lines). There are also many bus routes, including the 390 bus route.

Travelling by car

There are metered parking areas available with several pay and display bays that allow parking for up to four hours. They are all within a few minutes' walk on Duchess Street and Portland Place.

Referral & Clinical Service Highlights

At Cleveland Clinic London, we work in close partnership with you to provide the high-quality, coordinated care that your patients deserve. Our Patients First philosophy is at the heart of everything we do.

- Medical outpatient services, including diagnostic imaging and pathology, are provided at our Portland Place Outpatient Centre. Inpatient services are provided at our 184-bed hospital.
- You have rapid access to our services and world-renowned specialists through streamlined appointment scheduling, including a dedicated referral access phone line.
- Our outpatient services include including specialist consultations, diagnostic imaging, pathology and health assessments.
- We collaborate with King Edward VII Hospital, The London Clinic, Great Ormond Street Hospital and other highly regarded NHS and private providers to ensure seamlessly coordinated care pathways.
- A fully electronic medical records system with web-based and mobile applications gives you and your patients secure access to records and the ability to make referrals and appointments.
- Our care encompasses all medical and surgical conditions, but we specifically focus on heart, vascular & thoracic; digestive disease; neurosciences; and orthopaedics.
- High-acuity care is delivered to patients with the most complex needs, with 24/7 onsite intensive care specialists supported by a 29-bed Intensive Care Unit (ICU).
- We employ state-of-the-art technology throughout, including surgical robots and the U.K.'s first fully developed pharmacy bar coding/closed loop medication administration, with a unit-dose pharmacy robot.

How to Refer a Patient

Refer a patient via our dedicated referral line, fax or email.

T: +44 (0)20 3423 7777

F: +44 (0)20 7890 4466

E: cclreferrals@ccf.org

To contact our Acute Admissions Unit (AAU) and speak with our 24/7 AAU clinician about referring a patient:

T: +44 (0)20 3423 8999

Find a consultant

In addition to this guide, Cleveland Clinic London's **Find a Consultant** tool can be found at clevelandcliniclondon.uk/doctors. There you can search by name or filter by specialty area. The tool also includes photos and videos of our team.

Once you've selected a consultant, call us to arrange an appointment or request one online.

DrConnect

DrConnect® is an online tool that gives you secure, real-time information about the treatment progress of patients you've referred to Cleveland Clinic London. Designed to enhance your referral experience, DrConnect helps you request referrals, order labs and images, and communicate directly with Cleveland Clinic London consultants. For more information and to register for DrConnect, visit clevelandcliniclondon.uk/professionals/drconnect.

GP Liaison Service

Cleveland Clinic London's GP Liaison Team helps support GPs with referrals to our expert specialists. They can help you learn more about our services and facilities and answer any questions.

This team offers:

- · Up-to-date information on clinical developments and services.
- A direct point of contact for assistance with referrals and valuable feedback on our services.
- A link between our experts and you, including help facilitating consultant introductions.

They would be delighted to arrange a tour of our facilities, to give you the opportunity to learn firsthand about our services and treatments. For more information, contact the GP Liaison Team at cclgpliaison@ccf.org.

A focus on learning and education

Cleveland Clinic is proud to manage one of the largest accredited continuing medical education programmes globally, delivering over 1,500 learning opportunities and reaching over 300,000 learners annually. At Cleveland Clinic London, we prioritise research and medical education, and offer a series of regular Continuing Medical Education (CPD) educational events for GPs and AHPs — both in person and virtually. Visit clevelandcliniclondon. uk/gp-liaison to register to receive the latest news and information about Cleveland Clinic London and to find out about our upcoming events.

We welcome the opportunity to support your in-house learning by setting up bespoke educational practice meetings at your convenience. For more information, contact the GP Liaison Team at cclgpliaison@ccf.org.

Global Patient Services

Our Global Patient Services (GPS) Team ensures seamless care at Cleveland Clinic facilities worldwide, specifically for the unique needs of international patients.

The GPS Team is the main point of contact for embassies and health offices based in London. Team members deliver comprehensive services to ensure patients who are travelling for care get the support they need before, during and after their visit.

GPS services at Cleveland Clinic London include:

- Help with second-opinion services, scheduling medical appointments and booking treatment at Cleveland Clinic London.
- Complimentary language assistance for patients and their families from certified healthcare interpreters.
- A dedicated GPS case manager who will be with each patient every step of the way, serving as
 part of the care team during the patient's visit and overseeing their safe return home, including
 post-treatment care.
- Billing review and assistance with financial arrangements.
- Transportation arrangements, including airport pickup, and ground and air ambulance services to and from our facilities.
- A single point of contact for sponsoring offices to assist with financial estimates, provide regular updates on patients' medical care and needs, and support the coordination of take-home equipment and medication needs.

Our Institutes

At the heart of Cleveland Clinic London is our Patients First philosophy, which creates an environment that delivers unparalleled clinical care customised for your patients. Our best practices include tools, techniques and methods that are measurable, replicable and evidence-based, all designed to enhance your patients' experience.

Our multidisciplinary team approach brings different clinical perspectives to your patients' care, so they benefit from the expertise of many specialists. Cleveland Clinic London is organised into patient-centred institutes. Expert teams combine the medical, surgical and support functions for specific body systems or health disorders to improve patient care and experience.

clevelandcliniclondon.uk

Critical Care, Anaesthesia & Pain Institute

Our expert critical care consultants are uniquely resident in the hospital 24/7 to ensure the sickest patients receive comprehensive care and immediate attention. Complications sometimes happen during recovery from critical illness and complex surgical treatments, and the priority is to ensure experienced consultant care is always available at the bedside when it really matters.

Our pain consultants are experienced in treating acute pain after surgery, and in investigating and relieving long-term chronic pain with their multidisciplinary teams. They are available at all times in the hospital following surgery and for outpatient consultations for longer-term pain problems.

Critical care services include:

- 24/7 resident consultant-level care across 29 beds.
- Multi-organ support.
- Ventilation and respiratory therapy.
- Extracorporeal cardiac support.
- Rehabilitation.
- Onsite comprehensive imaging.
- · Dialysis and renal services.

Critical conditions treated include:

- Post-cardiac surgical care and cardiac failure.
- Post-neurosurgical critical care and brain injuries.
- Severe infectious diseases and sepsis.

- Respiratory failure requiring ventilation and weaning.
- Acute liver and kidney disease.
- · Long-term recovery from critical illnesses.

Anaesthesia services include:

- General, regional and local anaesthesia.
- · Sedation.
- Specialist anaesthesia for neurosurgery, cardiac surgery and other specialist surgery.
- Airway management.
- Enhanced recovery from surgery.
- Pain control, including spinal and epidural methods.

Pain management services include:

- Spinal injections.
- Nerve blocks.
- Implantable spinal cord stimulators.

Pain conditions treated include:

- Cancer-related pain.
- Complex regional pain syndrome (CRPS).
- Fibromyalgia.
- Lower back pain.
- Headaches.
- Postoperative pain.
- Rheumatoid arthritis and other autoimmune disorders.

Our surgical specialties include:

- Heart, vascular and thoracic surgery.
- Gastrointestinal surgery.
- Neurosurgery.
- Orthopaedic surgery.
- Plastic surgery.
- Bariatric surgery.
- Urological surgery.
- Colorectal surgery.
- Hepatobiliary surgery.
- Ear, nose and throat surgery.
- General surgery.

clevelandcliniclondon.uk 16 Referral Line +44 (0)20 3423 7777

Acute Admissions Unit

Call: +44 (0)20 3423 8999

At Cleveland Clinic London we cover every level of care across a wide range of specialties, all under one roof. We ensure quick and easy access to comprehensive and safe medical care for your patients. Our brand new, 12-bed Acute Admissions Unit (AAU) is located with our Intensive Care Unit. Our team of AAU consultants specialises in acute medicine and provides high-quality holistic care onsite. AAU consultants are supported by a dedicated multidisciplinary team to quickly assess, admit, stabilise and treat your patients.

Our referral-only AAU service offers:

- 24/7 direct access to onsite consultant-led service with a dedicated team of AAU clinical fellows and nurses.
- Access to a case management team for discharge coordination.
- Dedicated, in-house ambulance transport to transfer patients to our facility when necessary.
- Seamless transfer to our level 2 and level 3 ICU on the same floor, with 24/7 onsite ICU consultant coverage.
- Onsite MRI and CT scanners with robust imaging services and laboratory testing, including point-of-care testing for rapid results when indicated. There is an additional dedicated CT scanner on the third floor of our hospital for ICU and AAU patients.

 Advanced digital systems to provide accurate, real-time information on a patient's progress and treatment plan.

Our AAU team treats a broad range of conditions, including:

- Endocrinology and diabetes-related conditions.
- Frailty-related illnesses in older adults.
- · Gastrointestinal conditions.
- Haematologic conditions.
- Rheumatologic conditions.
- Renal (kidney) disease and perioperative haemodialysis.
- Respiratory conditions, including pulmonary embolism (PE), pneumonia and chronic obstructive pulmonary disease (COPD), and sleep disorders.

- Heart and vascular problems, such as unstable angina, heart failure, arrhythmias and deep vein thrombosis (DVT).
- Neurologic conditions.
- Surgical conditions, including acute biliary disorders and intestinal obstruction.
- Postoperative medical complications.
- Patients who may become unwell to day-case and radiology facilities, requiring overnight stay.
- Access to Infectious Disease, Microbiology and Clinical Liaison Psychiatry.

Our admission process:

Step 1: Referring GP or consultant calls our dedicated medical referral phone line (+44 (0)20 3423 8999) to discuss your patient with our 24/7 AAU clinician.

Step 2: Our team collects clinical and administrative information, screens for exclusion criteria and gives you an immediate response regarding admission.

Step 3: We liaise with you and your patient to ensure they have everything they need, ensuring easy access to our AAU, including arranging ambulance transport if needed.

Step 4: On arrival, your patient is greeted by our team. From there, we formally admit your patient and begin diagnosing the issue and forming a treatment plan.

Step 5: Whether it is a simple or complex issue, we aim to stabilise and discharge your patient or refer

them to the appropriate in-house specialty team for onward care. The patient will be regularly updated by their care team, with appropriate communications also shared with the referrer.

Admission exclusions:

- Patients under 18 years old.
- Patients with COVID-19 or COVID-19 symptoms.
- Patients with acute stroke or ST-elevation myocardial infarction.
- Pregnant patients at greater than 20 weeks' gestation or presenting with a primary obstetric problem.
- Patients with primary psychiatric issues or need for acute mental health intervention.

Digestive Disease & Surgery Institute

The Digestive Disease & Surgery Institute brings together highly specialised medical and surgical staff for the treatment of disorders related to the gastrointestinal tract as well as general surgery involving urology, gynaecology, and head and neck. We provide patients with the most advanced level of medical and surgical care across a wide range of specialties.

Bariatric Surgery

There is no one type of candidate for bariatric surgery, and we will always tailor treatment to each patient's unique needs.

Treatments and services include:

- Therapeutic dietary and lifestyle education combined with the latest GLP-1 therapy, which reduces hunger.
- Laparoscopic bariatric surgery using the latest technology to minimise postoperative discomfort and aid fast recovery.
- · Sleeve gastrectomy.
- Gastric bypass.
- Adjustable gastric banding.
- · Gastric balloon placement.

Colorectal Surgery

Our colorectal surgeons have expertise in all types of surgery, including keyhole, minimally invasive and open surgery. Our surgeons will assess what procedure is most suitable for your patients and use the most advanced techniques to ensure surgery is effective and maximises quality of life.

Colorectal conditions treated include:

- · Anal and colorectal cancer.
- Anal fissure and anal fistula.
- · Colorectal polyps.
- Diverticular disease.
- · Functional bowel disorders.
- Inflammatory bowel disease (IBD).
- · Piles (haemorrhoids).

We carry out surgery for common colorectal conditions as well as complex open surgery and minimally invasive procedures.

Treatments and services include:

- · Abdominal wall and abdominal hernia surgery.
- · Bowel cancer screening.
- Crohn's disease surgery.
- · Diverticular disease surgery.
- Functional pelvic floor service.
- One-stop clinics for common conditions including rectal bleeding, anal pain, and anal irritation or itching.
- Rectal prolapse service.
- Surgery for recurrent colorectal cancers.

Endoscopy

We offer the most advanced endoscopy techniques and procedures available, carried out by experienced gastroenterologists and surgeons.

Procedures include:

- · Colonoscopy.
- Endoscopic retrograde cholangiopancreatography (ERCP).
- Endoscopic ultrasound (EUS).
- · Enteral and colorectal stenting.
- · Upper gastrointestinal endoscopy.

Gastroenterology

We have a team of renowned gastroenterologists that specialises in diagnosing and treating common and complex GI and liver concerns.

Conditions treated include:

- Indigestion and reflux.
- Inflammatory bowel disease.
- · Constipation.
- Diarrhoea.
- Hepatitis and liver problems.
- Irritable bowel syndrome.
- Complex endoscopy and endoscopic obesity treatment.
- Swallowing difficulties.
- · Coeliac disease and food intolerances.

Treatments and services include:

- Colon and small bowel video capsule endoscopy.
- Colonoscopy.

- Endoscopic IBD therapy.
- Endoscopic intragastric balloon placement.
- Endoscopic retrograde cholangiopancreatography (ERCP).
- Endoscopic sleeve gastroplasty (ESG).
- Endoscopic ultrasound (EUS).
- Radiofrequency ablation for Barrett's oesophagus.
- Transoral incisionless fundoplication (TIF).

Gynaecology

Conditions treated include:

- Endometriosis.
- Fibroids.
- Gynaecological cancers: womb, ovarian, cervical, vulvar and vaginal.
- Urinary and faecal incontinence.
- · Vaginal prolapse.
- Bladder pain.

Procedures and treatments include:

- Acute gynaecology clinic: a fast-track service for women with suspected gynaecological cancer.
- Cervical biopsy.
- Coil (intrauterine system) insertion.
- Colposcopy.
- Hysteroscopy.
- Laparoscopy.
- Ovarian cystectomy.
- Pelvic floor training.
- Vaginal hysterectomy.

Digestive Disease & Surgery Institute (continued)

Head and Neck

Our head, neck and thyroid surgeons treat the full range of head and neck problems, from common concerns to complex cancers of the ear, nose, throat and thyroid. We offer a multidisciplinary team-based approach to ear, nose and throat (ENT) and thyroid conditions. Our experts use the latest technology and minimally invasive techniques to get the best outcomes for our patients.

Conditions treated include:

- · Airway disorders.
- · Head and neck cancer.
- Neck lumps.
- Salivary gland disease.
- · Snoring.
- Throat and tonsil problems.
- Thyroid cancer.
- Thyroid disease.

Treatments and surgeries include:

- Head and neck cancer surgery.
- Laser surgery.
- · Nose surgery.
- Parotidectomy.
- · Salivary gland surgery.
- Sinonasal surgery.
- Sinus surgery.
- Snoring surgery.

- Throat cancer surgery.
- Thyroidectomy.
- Tonsillectomy.

Hepatopancreaticobiliary (HPB) Surgery

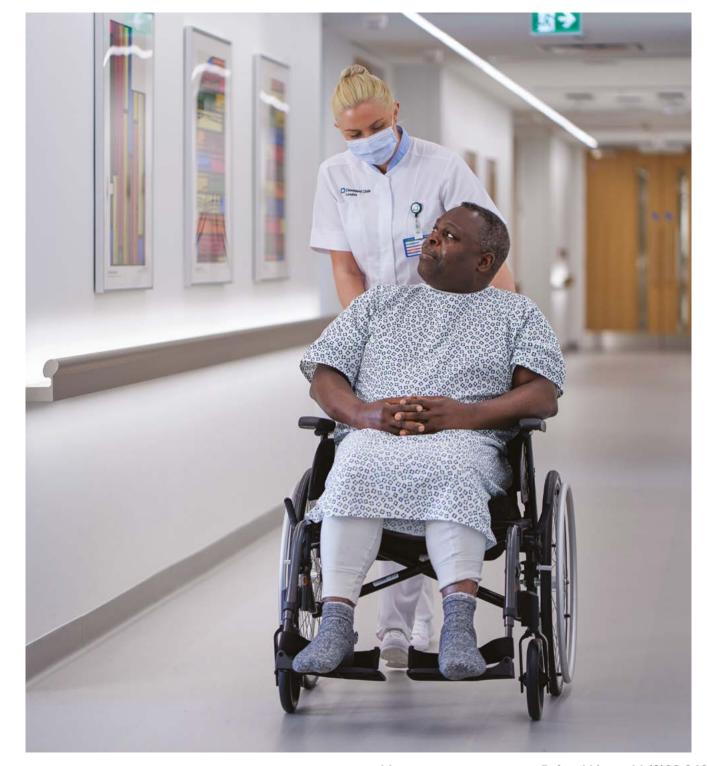

Our expert HPB surgeons will assess what procedure is most suitable for your patients. We use the most advanced techniques to ensure surgery is effective and enables your patients to get back to normal swiftly and with a better quality of life.

Conditions treated include:

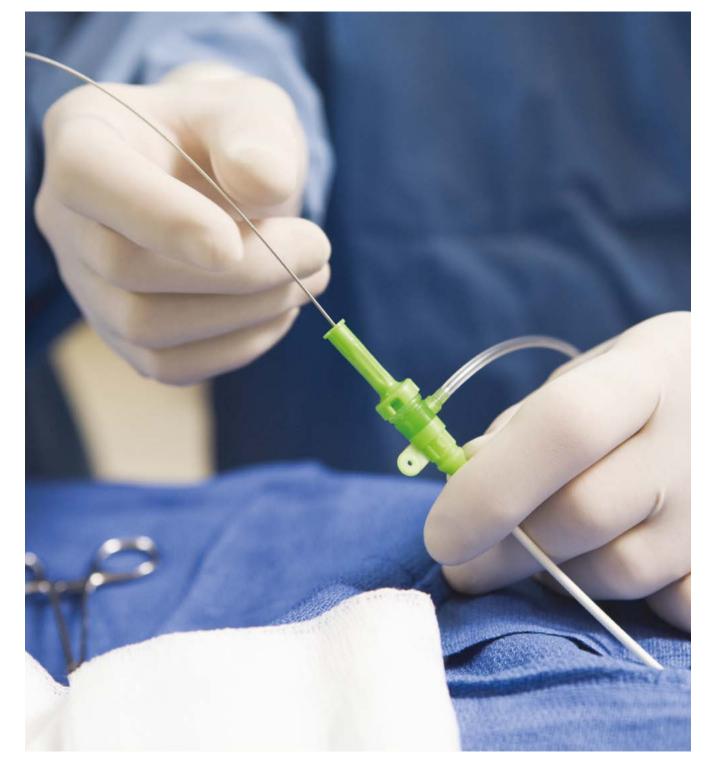

- Acute and chronic pancreatitis.
- Ampullary, pancreatic and duodenal cancers.
- Gallbladder and biliary diseases, including bile duct cancer.
- Gallstones.
- Liver abscesses, disease and tumours.
- Pancreatic cysts.

Treatments and surgeries include:

- Complex HPB cancer surgery.
- Gallbladder removal (laparoscopic cholecystectomy).
- Management of complications due to chronic pancreatitis.
- Pancreatic necrosectomy, a procedure to treat pancreatic necrosis, a serious complication of acute pancreatitis.

clevelandcliniclondon.uk 22 Referral Line +44 (0)20 3423 7777

Digestive Disease & Surgery Institute (continued)

Upper Gastrointestinal (GI) Surgery

Our highly experienced upper GI surgery team carries out advanced surgical procedures for conditions such as cancer, GI reflux, gallstones and pancreatitis.

Conditions treated include:

- · Benign hepatobiliary disease.
- · Benign oesophagogastric disorders.
- Benign upper GI conditions including gastro-oesophageal reflux disease.
- Dysphagia, a swallowing disorder.
- · Gallstones.
- Hepatobiliary, liver, oesophageal, oesophagogastric and stomach cancers.
- Pancreatic diseases including pancreatitis.
- Stomach ulcers.

Treatment and surgeries include:

- Gallbladder removal (laparoscopic cholecystectomy).
- Gastrectomy, the removal of part or all of the stomach.
- Laparoscopic and open hernia surgery.
- Management of complications after bariatric surgery.
- Open and keyhole surgery to the upper gastrointestinal GI tract.
- Oesophagectomy, surgery to remove part or all of the oesophagus.

Urology

Our urologists are world-leading experts in the field of urology and urological surgery. They use the latest techniques to rapidly diagnose urological conditions and put in place a comprehensive, tailored treatment plan that will ensure your patients get back to normal quickly and with a better quality of life.

Conditions treated include:

- Bladder, renal and prostate cancers.
- · Blood in the urine.
- · Chronic kidney infection.
- Kidney stones.
- · Lumps or swelling of the penis and testicles.
- Recurrent urinary tract infections.

Treatments and services include:

- Ablative therapies.
- Kidney stone treatments.
- Incontinence surgery.
- Open radical prostatectomy (ORP).
- Nephrectomy procedures.
- Precision diagnostic biopsies for suspected prostate cancer.
- Robot-assisted radical prostatectomy.
- · Urodynamics.

Heart, Vascular & Thoracic Institute

From state-of-the-art imaging to pioneering surgery, our Heart, Vascular & Thoracic Institute offers best-in-class care at every stage. When you trust us with your patients' heart health, we provide the experts and treatments they need to live their very best life.

Cardiology

We offer a full range of cardiology services for both common and complex conditions, including:

- · Heart checkups.
- Sports cardiology.
- · Device implantation and extraction.
- Electrophysiology.
- Interventional cardiology.

Heart diseases we treat include:

- Angina.
- · Aortic disease.
- Atrial fibrillation and other arrhythmia.
- Cardiomyopathy.
- Coronary artery disease.
- · Heart failure.
- · Heart valve diseases.
- Inherited heart diseases.
- Peripheral arterial disease.

Cardiac Imaging

Heart imaging services include:

- Echocardiography.
- · Stress echocardiography.

- 3D echocardiography.
- Cardiac CT.
- Dual-source CT.
- Cardiac MRI.
- CT coronary angiography.

Electrophysiology

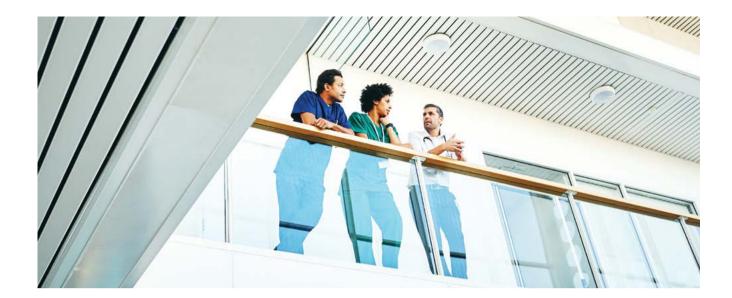

Electrophysiology services include:

- Advanced diagnostics including 3D electroanatomical mapping.
- · Catheter heart ablation.
- Atrial ablation therapy.
- Implantable cardioverter defibrillator (ICD) device implantation and management.
- Cardiac resynchronisation therapy.
- Lead extraction surgery.
- Leadless pacemaker implantation and management.

Interventional Cardiology

Interventional cardiology services include:

- Diagnostic cardiac catheterisation.
- Percutaneous coronary intervention.
- Rotational atherectomy.

- · Structural and valvular interventions.
- Transcatheter aortic valve implantation.
- Transcatheter mitral and tricuspid valve repair.
- Closure of atrial septal defects.
- Closure of left atrial appendage.

Heart Surgery

Our experts recommend nonsurgical treatments for heart conditions whenever possible. But for severe or complex disease that's reducing quality of life, we offer a full range of surgical procedures including:

- Minimally invasive heart surgery.
- Coronary artery bypass graft surgery.
- Arterial bypass surgery.
- Heart valve surgery.
- Aortic root surgery.
- Thoracic aortic surgery.
- Surgery for atrial fibrillation (AFib).

Whenever possible, we perform surgery using minimally invasive techniques. A number of our surgeons helped develop and perfect keyhole surgeries now used worldwide. At Cleveland Clinic London, we may recommend surgical treatment for heart conditions including:

- Repeat cardiac surgery for heart valve or coronary artery disease.
- Aortic aneurysms.
- · Arrhythmias.
- Combined coronary, aortic and valve disease.
- · Coronary artery disease.
- Endocarditis.
- · Heart failure.
- · Heart valve disease.
- Structural heart disease.

Heart, Vascular & Thoracic Institute (continued)

Thoracic

We treat a wide range of conditions affecting the chest cavity, including:

- Airway diseases and obstructions.
- Chronic obstructive pulmonary disease (COPD) and emphysema.
- · Collapsed lung.
- · Hyperhidrosis.
- Lung cancer and mesothelioma.
- Lung nodules.
- · Paralysed diaphragm.
- Pectus excavatum and pectus carinatum.
- Pleural effusion.
- Rib injuries and rib abnormalities including slipping rib syndrome.
- Thoracic abnormalities related to connective tissue disorders and neuromuscular disorders.
- Thoracic outlet syndrome.

Thoracic Surgery

Surgery for thoracic conditions includes:

- Navigational bronchoscopy and endobronchial ultrasound bronchoscopy (EBUS).
- Radiology-guided biopsies and treatments.
- Mediastinal surgery.
- Emphysema and COPD treatment.

- Chest wall surgery.
- Hyperhidrosis surgery.
- Lung-sparing surgery to remove lung cancer.
- Pectus excavatum and pectus carinatum surgery.

We most often use minimally invasive surgery, but also may recommend robot-assisted techniques for some surgeries.

Vascular

We treat a wide range of venous diseases and other conditions affecting the blood vessels, including:

- Aortic aneurysms, including thoracoabdominal aneurysms.
- · Atherosclerosis.
- · Blood clots.
- Carotid artery disease.
- Chronic venous insufficiency.
- · Critical limb ischaemia.
- Deep vein thrombosis (DVT).
- Peripheral vascular disease (PVD).
- Varicose veins.

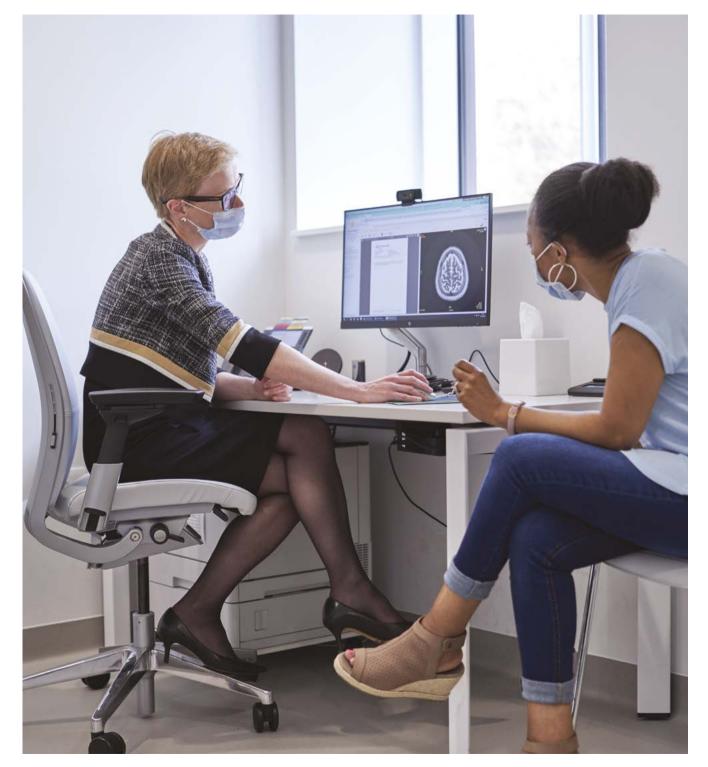

Vascular Surgery

Surgery for vascular conditions includes:

- Open and endovascular aneurysm repair (EVAR).
- Carotid endarterectomy.

- Varicose vein surgery.
- Deep venous reconstruction.
- Peripheral angioplasty.
- Peripheral arterial bypass surgery.
- Total aortic arch replacement.

Imaging Services

Services include:

- General radiography.
- Ultrasound.
- Fluoroscopy.
- CT.
- MRI (3T and 1.5T).

We offer the most advanced technology, including:

- CT virtual colonography.
- MR and CT angiography.
- Cardiac MRI and CT.
- Parametric prostate MRI.
- Functional MRI.
- Intraoperative MRI.

Interventional Radiology

Minimally invasive procedures and treatments include:

- Carotid, vertebral and intracranial angioplasty and stent placement.
- Fiducial marker placement.
- Cerebral and spinal angiography.
- Embolisation of cerebral aneurysms, arteriovenous malformations and tumours.
- Vertebroplasty and kyphoplasty.
- Coronary angiography.
- Coronary angioplasty and stenting.
- Hepatic, renal and fibroid embolisation.
- Tumour ablation.
- Biopsies, drainage and stenting.
- Cryoablation.
- Inferior vena cava (IVC) filter.

- Traumatic brain injury and concussion.

Imaging and diagnostics include:

- Neurophysiology services with electroencephalograms (EEGs) and electromyograms (EMGs).
- MRI scans and MR angiograms.
- CT scans.
- Doppler and ultrasound.
- Nuclear medicine imaging, including DAT scans and amyloid PET scans.
- Genetic testing.
- · Sleep studies.

Specialist treatment programmes include:

- Headache centre, including inpatient treatment, botulinum toxin treatment, nerve blocks and new-generation anti-CGRP therapies.
- Neuropsychology service.
- Inpatient and outpatient rehabilitation programmes.
- Mini-stroke or TIA clinic.
- Cognitive disorders service.

Neurorehabilitation

Our state-of-the-art, 40-bed neurorehabilitation unit is run by dedicated neurology and rehabilitation medical specialists and a highly experienced multidisciplinary therapy team. We have two therapy gyms, the latest robotic rehabilitation equipment and devices enabling high-intensity therapy programmes. Our unit can treat patients with the most complex levels of disability, including people with tracheostomies. Our aim is to maximise recovery for people with brain and neurologic injury, using an individually focused, goal-directed, multidisciplinary approach to enhance recovery.

Conditions treated include:

- Stroke.
- Traumatic brain injury.
- Long-term neurologic conditions, such as multiple sclerosis and Parkinson's disease.
- Musculoskeletal disorders.
- · Coma and low-awareness states.
- Spinal cord injury.
- · Guillain-Barré syndrome.

Services include:

- Intensive multidisciplinary rehabilitation.
- Inpatient and outpatient programmes.
- · Neuropsychology.
- · Physiotherapy.
- Speech and language therapy, including aphasia treatment and instrumental swallowing assessments.
- · Occupational therapy.
- Bespoke splinting and orthotics.
- Spasticity management programme, including EMG-guided botulinum toxin injection and baclofen pumps.
- Disability management programme.
- Management of tracheostomies.
- Specialist dietetic services to support artificial feeding and hydration.

Neurosurgery and Spine Surgery

We use the latest technology and techniques, including minimally invasive procedures, for brain, spinal and neurovascular surgery.

Conditions treated include:

- Brain haemorrhage, aneurysms and vascular malformations.
- Brain, pituitary and spinal tumours.
- Head injury.
- Spinal discs, degeneration, deformity and pain.
- Trigeminal neuralgia.
- Epilepsy surgery.
- · Hydrocephalus.

Treatments and services include:

- Brain biopsy.
- · Cranial and spinal robotics.
- Deep brain stimulation.
- Epilepsy surgery.
- Gamma Knife® radiosurgery.
- Interventional MRI.
- · Minimally invasive laser therapy.
- Nerve, muscle and arterial biopsies.
- Neurovascular surgery.

Orthopaedics, Plastic Surgery & Rheumatology Institute

We offer expert diagnosis, state-of-the-art treatment and rehabilitation for any injury or disease of the bones and joints, from simple fractures to complex tumours. Our team of world-leading medical and surgical specialists provides comprehensive care for a variety of orthopaedic and rheumatologic conditions.

Orthopaedics

Bone and soft tissue tumour services include diagnosis and treatment of:

- · Benign bone tumours.
- Benign soft tissue tumours.
- Metastatic bone disease.

Foot and ankle services include diagnosis, treatment and rehabilitation of:

- · Achilles tendinitis.
- Ankle pain, injuries and fractures, including malunion and nonunion.
- Arthritis.
- Bunions, toe deformities and ingrown toenails.
- Plantar fasciitis and metatarsalgia.
- Sports injuries.

Our experts recommend nonsurgical treatments whenever possible, but where surgery is required we offer the latest procedures — from state-of the-art, minimally invasive surgery to complex reconstruction.

Surgical options include:

- Arthroscopy.
- Fusion.
- Joint replacement.
- Lateral ankle ligament reconstruction.
- Tendon surgery.

Hand and wrist conditions treated include:

- Arthritis.
- Carpal tunnel syndrome.
- Dupuytren's disease.
- · Forearm injuries.
- Fractures.
- Pinched nerves.
- Trigger finger.

Surgical treatment includes:

- Joint fusion.
- Joint replacement.
- Tendon surgeries.
- Wrist arthroscopy.

Hip, knee and pelvis conditions treated include:

- ACL injuries.
- Arthritis.
- Hip impingement syndrome.
- · Osteoarthritis.
- Torn meniscus.

Diagnostic procedures and treatments include:

- Chondral surgery to repair cartilage damage.
- · Ligament repair and replacement.
- Meniscal repair and transplant.
- Minimally invasive arthroscopic surgery.

Joint replacement and related surgeries include:

- · Hip replacement.
- · Hip revision.
- Hip resurfacing.
- Kneecap replacement.
- Partial and total knee replacement.

Shoulder and elbow conditions treated include:

- Arthritis.
- Dislocated or frozen shoulder.
- Golfer's elbow and tennis elbow.
- Rotator cuff injuries.
- Shoulder bursitis and shoulder impingement.
- SLAP tears.

Treatments and surgeries include:

- Minimally invasive keyhole/arthroscopic surgery.
- Latarjet surgery to treat recurrent shoulder dislocations.
- Shoulder joint replacement.
- Surgical treatment of shoulder fractures.
- Surgery for shoulder instability.

Peripheral nerve conditions treated include:

- Carpal tunnel syndrome.
- · Cubital tunnel syndrome.
- · Thoracic outlet syndrome.
- Tarsal tunnel syndrome.
- Brachial plexus injury and brachial plexus tumour.
- Brachial neuritis and Parsonage-Turner syndrome (neuralgic amyotrophy).
- Nerve tumours, including schwannoma and neurofibroma.
- Nerve injury, including cut nerves, stretched nerves and compressed nerves.
- Sports nerve injuries.
- Pinched nerves.
- Denervated muscles.
- Median nerve compression.
- · Ulnar nerve compression.
- Suprascapular nerve compression.
- · Radial nerve compression.
- Gluteal space compression and piriformis syndrome.
- Neuropathic pain from neuroma/scarred nerve.
- Adolescent and adult effects of Erb's palsy.

Orthopaedics, Plastic Surgery & Rheumatology Institute (continued)

Treatments and surgeries include:

- Nerve graft (autograft or allograft).
- Nerve transfer.
- Neurolysis.
- Neuroma relocation.
- Thoracic outlet decompression.
- Excisional biopsy of nerve tumour.
- Targeted muscle reinnervation (TMR) for myoelectric prosthetic control and pain reduction.
- Free functional muscle transfer.
- Implanted nerve stimulator.
- Surgery for the effects of Erb's palsy.

Rheumatology

No matter what type of rheumatologic disorder your patients are dealing with, we can provide an accurate diagnosis and help them easily navigate the right treatment plan. To diagnose conditions quickly and accurately, we use the latest technologies, including:

- Autoimmune blood profiling.
- MRI.
- Ultrasound.

Rheumatic conditions treated (with antibody therapies, biologic medications, physiotherapy, steroid injections and surgery) include:

- Arthritis/rheumatoid arthritis.
- Bursitis.
- Gout.
- Lupus.
- · Vasculitis.

Sports Medicine

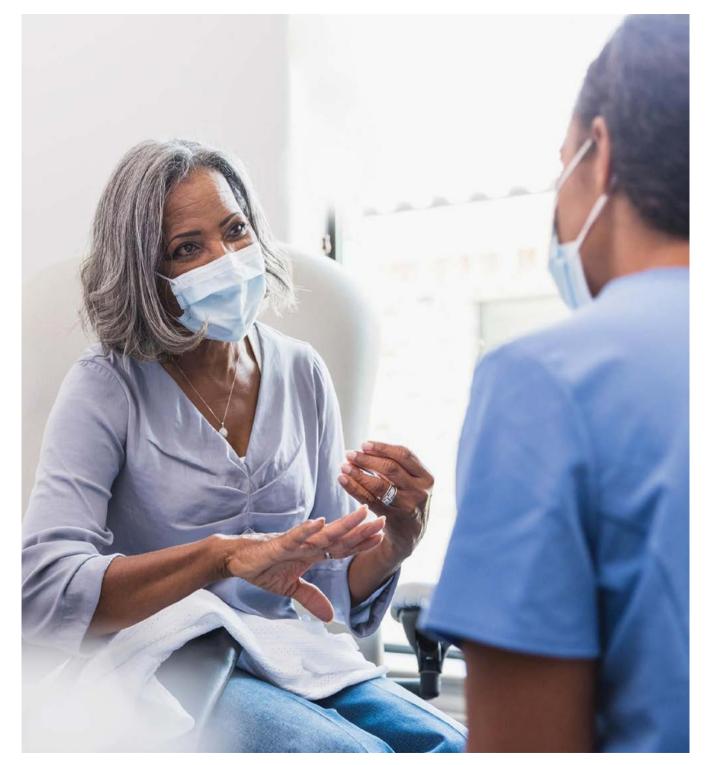

Our dedicated team of experts will work with your patients — whether high-performance athletes or individuals dealing with arthritis — to determine the best treatment plan tailored for them.

Conditions treated include:

- Joint pain.
- Arthritis and other musculoskeletal pain.
- Pain induced by exercise.
- Tendon pain.

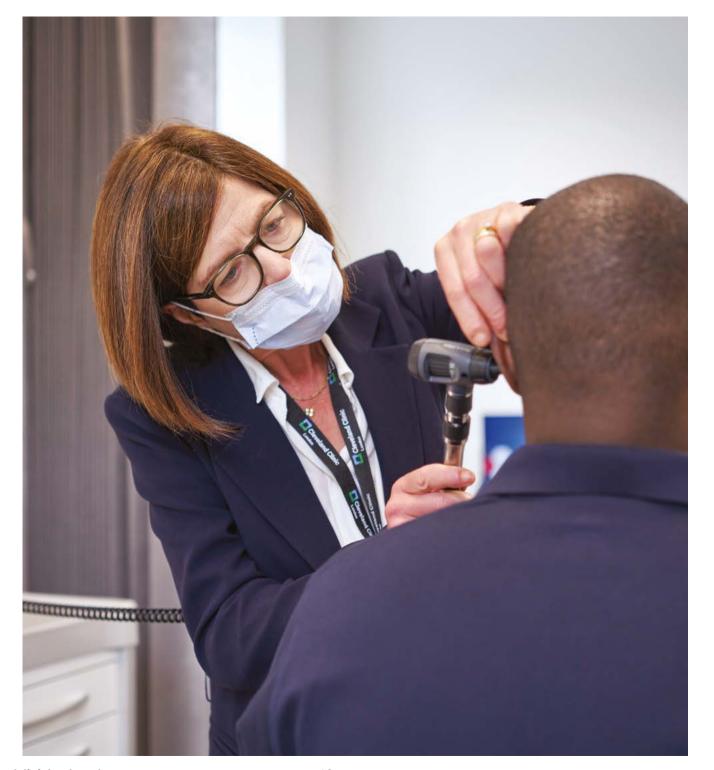

Treatments include:

- Full health assessment, including medication review.
- Joint injections.
- Personalised exercise plan.
- Shockwave therapy.

clevelandcliniclondon.uk 38 Referral Line +44 (0)20 3423 7777

Health Assessments

Our skilled clinicians perform health evaluations tailored for each patient, to help them make healthier choices and reduce the risk of serious medical problems.

Advanced health assessments

Advanced health assessments provide comprehensive evaluation and testing. They include:

- Full health history and a review of immunisations and medications.
- Complete physical examination, including skin evaluation and vision test.
- Sleep, nutrition and mental health assessment.
- Heart and lung function tests, including ECG and spirometry.
- Cardiac stress test or exercise stress test, including a chest X-ray.
- Lab testing, including cancer marker tests (upon request).
- Male-and female-specific tests.
- A 15-minute follow-up visit (in person or virtual) to review test results and recommendations.

Executive health assessments

Executive health assessments are in-depth evaluations tailored to the unique needs of each patient. Sessions include all the services offered in our advanced health assessments, plus:

- Advanced diagnostic imaging, including an MRI, CT scan and ultrasound.
- Hearing test.
- Virtual consultation with a nutritionist to discuss dietary recommendations.
- A 30-minute follow-up visit (in person or virtual).
- Coordination of onward care, including referral, appointment scheduling and insurance authorisation assistance.

Clinical Interests: Pelvic Floor Disorders, Overactive Bladder, Vaginal Prolapse,
Urinary Tract Infections, Menopause.

NHS Base: Barts Health NHS Trust

Miss Shirin Khanjani MD, PhD, MRCOG
Consultant Gynaecologist and subspecialising in Reproductive Medicine and Surgery
Clinical Interests: Infertility, Menopause, Premenstrual Syndrome, Poor Ovarian Reserve.

NHS Base: University College London Hospitals NHS Foundation Trust

Prof Mohamed Mabrouk MB ChB, MSc, MD, PhD Consultant Gynaecologist and Minimal Access Reproductive Surgeon Clinical Interests: Endometriosis, Fibroids, Female Health, Cysts, Pelvic Inflammatory Disease.

NHS Base: Cambridge University Hospitals NHS Foundation Trust

GYNAECOLOGY (CONT)

Mr Fevzi Shakir MBBS, BSc (Hons), MRCOG, MSc Consultant Gynaecologist

Clinical Interests: Endometriosis, Fibroids, Menopause, Pelvic Floor Disorders.

NHS Base: Royal Free London NHS Foundation Trust

Mr Arvind Vashisht MA, MD, FRCOG
Consultant Gynaecologist
Clinical Interests: Endometriosis, Pelvic Floor Disorders, Vaginal Prolapse,
Urinary Incontinence, Urinary Tract Infections.

NHS Base: University College London Hospitals NHS Foundation Trust

HEPATOBILIARY SURGERY

Mr Charles Imber MD, FRCS, MB BChir, BSc (Hons)
Consultant Hepatobiliary and Liver Transplant Surgeon
Clinical Interests: Liver Cancer, Pancreatic Cancer, Gallbladder Disease,
Biliary Disease, Hernia.

NHS Base: Royal Free London NHS Foundation Trust

Mr Satheesh Iype MBBS, MBBS, MS, DNB, MCh, MRCS, MPhil (Cantab), FEBS, FRCS
Consultant Hepatobiliary and Liver Transplant Surgeon
Clinical Interests: Gallbladder Disease, Liver Cancer, Pancreas Tumours, Benign Hepatobiliary Disease, Bile Duct Cancer.

NHS Base: Royal Free London NHS Foundation Trust

HEPATOBILIARY SURGERY (CONT)

Prof Massimo Malago MS, FRCS
Consultant Hepatobiliary Surgeon
Clinical Interests: Gallbladder Cancer, Gallstones, Liver Cancer, Pancreatic Cancer.

Mr Krish Menon MS, FRCS
Consultant Liver Transplant and Hepatobiliary Surgeon
Clinical Interests: Gallstones, Liver Tumours, Pancreatic Cancer, Pancreas Tumours.

NHS Base: King's College Hospital NHS Foundation Trust

HEPATOLOGY

Dr Brian Hogan MBBS, BSc, FRCP, FEBTM, FFICM
Consultant Hepatologist
Clinical Interests: Liver Disease, Abnormal Liver Function, Fatty Liver Disease, Liver Cirrhosis, Portal Hypertension.

NHS Base: King's College Hospital NHS Foundation Trust

Prof Alastair O'Brien BSc, MBBS, FRCP, PhD
Consultant Hepatologist
Clinical Interests: Liver Disease, Liver Cirrhosis, Liver Haemangioma, Liver Cancer, Obesity.

NHS Base: Royal Free London NHS Foundation Trust

HEPATOLOGY (CONT)

Dr Vishal Patel BSc (Hons), MBBS, PhD, FRCP
Consultant Hepatologist
Clinical Interests: Acute-on-Chronic Liver Failure (AOCLF), Liver Cirrhosis, Liver Disease,
Abnormal Liver Function, Gastro-Oesophageal Varices.

NHS Base: King's College Hospital NHS Foundation Trust

Dr Jonathan Potts PhD, MRCP
Consultant Hepatologist
Clinical Interests: Biliary Disease, Bile Duct Stones, Bile Duct Cancer,
Liver Cirrhosis, Liver Disease.

NHS Base: Royal Free London NHS Foundation Trust

UPPER GASTROINTESTINAL SURGERY

Mr Ahmed Ahmed PhD, FRCS (Gen)

Consultant Upper Gastrointestinal and Bariatric Surgeon

Clinical Interests: Obesity, Acid Reflux, Gallstones, Hernia, Hiatal Hernia.

NHS Base: Imperial College Healthcare NHS Trust

Ms Avril Chang MBBS, FRCS (Eng), FRACS
Consultant Upper Gastrointestinal and General Surgeon
Clinical Interests: Gallstones, Hernia, Hiatal Hernia, Obesity, Bile Duct Stones.

NHS Base: King's College Hospital NHS Foundation Trust

UPPER GASTROINTESTINAL SURGERY (CONT)

Mr Sacheen Kumar PhD, FRCS (Gen Surg), MRSC (Chem)
Consultant Upper Gastrointestinal Surgeon
Clinical Interests: Oesophageal Cancer, Gastrointestinal Stromal Tumour (GIST),
Achalasia, Acid Reflux, Gastro-Oesophageal Reflux Disease (GORD).

NHS Base: The Royal Marsden NHS Foundation Trust

Mr Boz Mohammadi BSc, MBBS, FRCS
Consultant Upper Gastrointestinal and General Surgeon
Clinical Interests: Oesophageal Cancer, Stomach Cancer, Gastro-Oesophageal
Reflux Disease (GORD), Gallstones, Hernia.

NHS Base: University College London Hospitals NHS Foundation Trust

Mr David Monk MB ChB, FRCS (Eng), FRCS (Gen Surg), DipEd (MedEd)
Consultant Upper Gastrointestinal, Bariatric and General Surgeon
Clinical Interests: Oesophageal Cancer, Stomach Cancer, Obesity, Hiatal Hernia, Hernia.

Prof (Mohammed) Muntzer Mughal MB ChB, FRCS, ChM Consultant General and Upper Gastrointestinal Surgeon Clinical Interests: Oesophageal Cancer, Stomach Cancer, Acid Reflux, Hiatal Hernia, Oesophageal Disorders.

NHS Base: University College London Hospitals NHS Foundation Trust until 2017
